The Honorable Ann Wagner  
U.S. House of Representatives  
Washington, DC 20515

Dear Members of Congress:

Thank you for your letter of July 17, 2014, to the U.S. Environmental Protection Agency, Region 7, about our work at the West Lake Landfill Superfund site. I want to assure you, we understand your concerns about the pace of work at West Lake and take the responsibility of ensuring the health and safety of this community very seriously.

The draft schedule the U.S. Army Corps of Engineers and the Potentially Responsible Parties developed indicates a period of 17 months (from the time the alignment decision is final) to prepare, review and approve the Isolation Barrier design plans. This will occur concurrently with additional field work utilizing Ground Cone Penetrometer Testing/coring to collect the remaining geotechnical and radiological data needed for the design. The time to construct the barrier is not defined but would likely be six months or more.

---------	----------	---------	---------	---------

The EPA's first Interagency Agreement is with USACE, not with "FUSRAP." Under this IA, the EPA

has used USACE to:

- Evaluate the IB pros and cons, potential alignments, schedules, and technologies to construct the barrier;
- Assist the EPA at Community Advisory Group meetings and in preparing responses to CAG questions;
- Assist the EPA in reviewing the draft and revised Isolation Barrier Pre-Construction workplans;
- Provide guidance to EPA senior leadership on the technical evaluation of the isolation barrier alignments; and
- In the future, they will assist the EPA with review of the design documents for the IB and conduct field oversight of barrier construction.

The EPA and USACE have entered into a second IA under which USACE will provide independent technical reviews of the deliverables the PRPs generate under the Supplemental Supplemental Feasibility Study workplans. These workplans were scoped to address the National Remedy Review Board comments from our “early consultation” on the Supplemental Feasibility Study.

Again, thank you for your letter. The EPA remains committed to ensuring the health and safety of the West Lake community.

If we can be of any further assistance, please feel free to contact me at 913-551-7006, or your staff may call LaTonya Sanders, Congressional Liaison, at 913-551-7555.

Sincerely,

Karl Brooks
